Five Years Running...

Ken Trevenna, Director of Operations

London, Ontario, Canada

August, 18, 2010 What do the students of the Ontario Institute of Audio Recording Technology (OIART) have in common? **For five years now, they have all learned music production with Avastor HDX Series Hard Drives.** Based in London, Ontario, Canada, OIART offers students a comprehensive immersion program that prepares graduates for professional careers in music recording, live sound, audio for picture and related fields. Avastor's HDX continues to be the instructor's choice for their students.

"Avastor HDX drives meet our criteria, offering a professionally designed hard drive that successfully completes the challenges of editing and streaming hi-res digital audio on our Pro Tools workstations," says OIART Director of Operations Ken Trevenna. "We like its robust auto-switching internal AC power supply, cooling fan and unique screw-less assembly on its drive enclosure. The NARAS approved label set and Porta Pak packaging completes the system."

OIART is supplied by Encore Data Products.

About Avastor

Headquartered in Peachtree City, GA, Avastor brings full-featured digital storage devices, with the highest quality and performance, to the professional audio and video marketplace. The company's flagship product, the HDX hard disk drive system, is produced in the USA with a mandate for superior build quality and 100% quality testing, aimed directly at the demands of professional audio and video applications.

Avastor and HDX are trademarks of Avastor Inc. All other marks herein may be property of their respective owners.
